

Best Practices

Best Practices 1:

Title: Alumina success story.

Objectives:

- To educate our student about career opportunities in industries and various fields.
- To develop industrial requirement skills of students.
- To enhance our student's confidence.

Context:

Our institute organized successful alumina speech to address students for motivation and enrichment. Recognized alumina working in various sectors like MNCs, Government sectors, appearing for competitive examinations are invited by the institute. They share their ideas, experiences and knowledge which help students to decide their career goals in various platforms.

They advice students to take advantage of institute facilities like skill development program, motivating for participation in various inter and intra college competitions which enrich student's extracurricular abilities.

Best Practices 2:

Title: Continuous academic monitoring of the students and class.

Objectives:

- To improve teaching learning abilities of students and faculty members.
- To enhance student's Regularity, Performance, Punctuality (RPP) and submission, practical and oral skills.
- To make student professional learners.

Context:

Institute has implemented continuous assessment tools for assessment of regular teaching learning activities. One of them is Continuous Assessment Sheet (CAS).In CAS termwork marks are distributed in various fields like Regularity, Performance, Punctuality (RPP) and submission,practical,oral (SPO) in which each and every student is asses by their involvement ,understanding and knowledge about practical and theory.

Other tool is unit tests. In each semester minimum two unit tests are conducted and weightage of their test marks are included in final term work. Also class and practical attendance are monthly monitored for allocation of term work marks.
