ABOUT CESA

Association of Civil Engineering is formed by civil engineering students. The student council is entirely run by students, working in tandem with departmental faculty to coordinate. The CESA was founded with the goals of fostering ethical principles, improving teamwork among civil engineering students, and planning a variety of events for the holistic development of the students. Students can use this platform to work on current trends in the field of civil engineering, develop new skills, and gain fresh perspectives. One way to define CESA is as for the students, by the students.

CESA Objectives:

CESA seeks to instill in its members an understanding and respect of the many specialties within not only civil engineering but also other pertinent subjects. CESA wants to be an active group within the Civil Engineering department and give a forum for all students at AGTT's Dr. Daulatrao Aher College of Engineering, Karad.
