DEPARTMENT OF CIVIL ENGINEERING

Newsletter

AAKAR

2020-21 SEM II

Vision

To produce globally competent civil engineers for the sustainable development of the society.

Mission

We the Department of Civil Engineering are committed to achieve our vision by

- M1. Empowering the student with sound technical knowledge and professional skills.
- M2. Grooming civil professionals with ethical values for research, development, entrepreneurship & leadership for sustainable development of the society.
- M3. Applying modern construction techniques and materials along with construction management principles for continuous improvement and enhancing employability skill.

About Us

The Civil engineering program will serve Connecting link to the nation by providing a quality engineering education that enables students to enter a profession that can improve the civil infrastructure, and economic welfare. Our civil engineering program will maintain a strong emphasis on undergraduate education with the goal that our program will be recognized for quality instruction in civil engineering analysis and design. An important emphasis of the civil engineering program is preparation of students for professional engineering licensure and practice, and we expect that most of our students will pursue this objective following graduation.

	2	Lade Sonal Ghansham	90.47
	3	Chunnade Shubhada Kedarnath	89.62
	4	Chavan Rushikesh Sunil	87.70

Alumina Article

To,

All my junior friends in AGTI's D.A.C.O.E. Karad.

I am writing this article to share my some thoughts which will be helpful for you in your future life. First of all my dear friends who are reading this article I know some of you will know me as a senior and some of my friends don't know me. So for all of them, I am one of you all. I can understand your this phase of life and all your feelings.

We are studying here to be a good engineer and we know it very well. But all of us have one feeling of 'fear' in mind which is very harmful to all of us. We fear about putting our thoughts in front of all, we fear ' what will they think?' , that you still don't know this. I also have suffered from these negative thoughts. I will like to tell you all, each and every student of this college has a potential to achieve everything that you want. You have that much of caliber to be a successful engineer. And the main thing that affects your life is your own confidence. We as an individual have our own grasping power. And we are blessed with such a nice teaching staff. I know they always try to build our confidence level. So if you don't know anything just accept it. Discuss it with our teachers and friends. I promise you will definitely find a right way.

The main fact of our life is we have to learn each and everything through our own experience. Don't be shy and nervous to ask any query. Enjoy your life. Enjoy the process of learning. Be confident and always be loyal to yourself. This is the best thing you can do for yourself. Focus on curriculum and extra curriculum activities. They will definitely help in building your confidence level. This is the simple thing that I have learned during my college life. We all are blessed with a great platform and fantastic guides in our life. And I must say "*Don't be afraid to fail, be afraid not to try.*" So enjoy everything, discuss everything with your teachers and friends. I know you are going to be an excellent engineer in future. Me and my classmates are really very thankful to our institute for supporting us. I hope this article will be helpful to all of you. Thank you. I wish all of you a bright future. Be a good decision maker. Good luck! Bright future is calling you!

Nikita Pralhad Mali.

B.E. Civil, 2019 batch.
